

POLE BANDS

Pole bands is a hardware component used to link secondary racks to poles. The secondary racks are used to support additional pole line accessories and even wires. Pole bands are sometimes referred to as pole fasteners and fastening clamps.

Pole bands are offered as a power line pole band and a telephone pole band.

SECONDARY CLEVIS

The primary function of a secondary clevis is for low-voltage dead end or an overhead wire. This style of part is also known as the dead end clevis, is an iron bracket formed into the shape of the letter "D".

DOUBLE ARMING BOLTS

The primary function of a double arming bolt is to provide support during the assembly of the cross arm. It creates space between the cross arms, allowing you to fasten them easily.

POLE EYE PLATES

Eye plates provide the clevis eye with a 5/8" maximum pin diameter.
